

VitalSync

The Smart Clinic OS

Uniting Doctors, Chemists, and Labs into a seamless Digital Pod.

Patna, Bihar

The Core Problem

Silos Create Friction and Revenue Leakage

1. **The Disconnected Triad:** The Doctor, Pharmacy, and Lab operate completely blind to each other.
2. **Lost Patient Retention:** Pharmacies lose chronic refill patients to online giants (1mg, Apollo).
3. **Data Entry Paralysis:** Doctors see 100+ patients a day. Current EMR software slows them down.
4. **App Friction:** Patients refuse to download multiple heavy apps.

The Solution: Clinic OS

A "Zero-Data-Entry" Ecosystem Uniting the Triad

- **Doctor Console:** AI Ambient Scribe listens to consultations and auto-generates digital prescriptions. **100% Zero-Data-Entry.**
- **Compounder Desk:** AI instantly digitizes handwritten paper prescriptions in 2 seconds.
- **Pharmacy & Lab:** The moment a doctor prescribes a medicine, it instantly appears on the Chemist's POS.

The Patient Experience

100% WhatsApp. Zero App Downloads.

The 1-Tap Workflow:

1. **Consultation Finished:** Patient receives a sleek Digital Health Card PDF instantly on WhatsApp.
2. **Evening Lab Review:** Clinic OS AI summarizes the lab report in Hinglish and sends a WhatsApp prompt.
3. **Actionable Buttons:**
 - [ Physical Review at Clinic]
 - [ Virtual Video Review]

The "Goldmine" Engine

Automated Chronic Care Management

- **Day-25 Auto-Refill:** A WhatsApp bot pings the patient: "*Your medicines are running out.*"
- **1-Click Dispensation:** Patient taps [ Confirm 1-Click Refill] .
- **Immediate Local Action:** The order instantly pops up on the local Pharmacy's queue.

Result: The local chemist stops losing recurring business.

The Collaborative Ecosystem

Formalizing the Healthcare Triad

- **Seamless Fulfillment:** Prescribed medicines and lab tests are pre-reserved at the clinic's local partners.
- **Unified Billing Hub:** When a patient clears a unified bill, the Clinic OS instantly calculates and settles the amounts for the Pharmacy and the Lab securely.
- **The Magic:** Doctors get streamlined operations. Patients get a seamless, cashless experience.

The Disruptive Business Model

Simple, Transparent SaaS Pricing

- **90-Day Free Trial:** Clinics get 3 full months to experience the automation and ROI at zero cost.
- **₹999 / Month Flat Subscription:** Affordable flat monthly fee for the entire pod (Doctor + Pharmacy + Lab).
- **Consultation Immunity:** 100% of the patient's consultation fee goes directly to the doctor's bank account.
- **Emergency SOS Fee:** Optional surge pricing for Priority #1 queue routing

Technology Moat

Silicon Valley Tech for the Heartland

- **Real-Time CDC Engine:** Sub-300ms data sync across consoles using Postgres CDC (`supabase_realtime`).
- **AI Ambient Scribe & Vision OCR:** Llama-3 70B & Gemini Flash guarantee hallucination-free extraction.
- **Offline Sentinels:** Built to withstand patchy networks with automatic offline sync queues.

Alignment with Bihar Startup Policy

1. **Massive Untapped TAM:** Patna represents a massive unstructured healthcare economy ready for digital transformation.
2. **Wealth Creation:** Keeps capital within the state instead of exporting it to national pharma-tech giants.
3. **Social Impact:** Improves chronic disease management for underserved populations using Hinglish AI summaries.

The Ask

Seeking Seed Funding to Scale

- **Objective:** Deploy the Clinic OS in the first 100 localized Pods across Patna.
- **Use of Funds:**
 - **40% Go-to-Market:** Ground ops agents to onboard independent clinics.
 - **40% Product Scale:** Perfecting local-language LLMs (Bhojpuri/Hindi).
